

How to write a successful ICDP proposal – Virtual Q&A Sessions

Plan to submit a proposal? Here's your chance to ask!

We offer individual proposal preparation help for proponents planning to submit a proposal until January 15, 2022.

Q & A Sessions during our Virtual Office Hours

In order to provide support in proposal preparation and writing, the Operational Support Group (OSG) is hosting individual virtual consultation hours for proposal-tailored training and discussion.

We invite proponents of **preliminary, workshop, land-to-sea (L2S) and full proposals** to an online seminar for discussion including very brief lightning talks and detailed consultation on key subjects of proposals including but not limited to:

- Scientific themes of ICDP
- Pre-site survey
- Drilling and science operations
- Data and sample management
- Downhole logging and monitoring
- Instruments and service provision
- Education, outreach, capacity building
- Cost and budget, risk assessment
- 3rd party funding acquisition
- Examples from successful proposals
- Reasons to fail
- Review guidelines
-others as requested

For each session we will provide expertise and – if possible – include peers that have been active in leading roles in previous proposals. Follow-up meetings will be scheduled according to needs.

Provisional dates: **November: 22 to 26, 2021 and December: 6 to 10, 2021**

Format: **OSG will provide video teleconferencing via Zoom**

Please contact Carola Koegler (c.koegler@icdp-online.org) or Uli Harms (u.harms@icdp-online.org) for determining topics and appointments.
