

Amphibious Projects

Call for
joint
proposals

IODP and ICDP aim to foster joint cooperation projects by inviting scientists to submit proposals for which full achievement of the scientific objectives require scientific drilling at both onshore and offshore sites (Amphibious Drilling Proposals). Such proposals are reviewed by the two programmes followed by a single integrated review statement. This call is open to investigators from ICDP- and IODP-member countries.

common
goal

scientific drilling
in oceans and on continents

the need for scientific drilling

All parts of the Earth system - the solid Earth, hydrosphere, atmosphere, cryosphere and biosphere - are linked through flows of mass, energy and life. Interactions between these realms have affected the development and evolution of our planet and ultimately determined its habitability through time.

As a growing global population demands more resources and a better understanding of geological hazards and ongoing and future climate change, access to data and samples acquired through scientific drilling is essential.

2 major
programmes,
1 common
goal

Two major international scientific drilling programmes, the **International Ocean Discovery Program (IODP)** with its European part **ECORD (European Consortium for Ocean Research Drilling)** and the **International Continental Scientific Drilling Program (ICDP)** have brought major advances to understand the Earth system.

IODP & ICDP Members (ECORD in blue):

Austria	Germany	South Africa**
Australia*	Iceland**	South Korea*
Belgium**	Ireland*	Spain
Brazil*	India	Sweden
Canada*	Israel**	Switzerland
China	Italy	The Netherlands
Czech Republic**	Japan	United Kingdom
Denmark*	Norway	UNESCO**
Finland	Portugal*	USA
France	New Zealand	

*IODP Member only, **ICDP Member only

Drilling

The
ICDP-IODP
open access
programme
journal

Scientific Drilling is a multidisciplinary journal focused on bringing the latest science and news from scientific drilling activities and related programmes to the geosciences community.

Scientific Drilling delivers peer-reviewed Science Reports from recently completed and ongoing international scientific drilling projects. The journal also includes Workshop and Progress Reports, Technical Developments and News and Views for the community.
