

Call for Session

Important Dates

Session proposal deadline:
27 August, 2021 - 20 October, 2021

Date of submission of papers and abstracts:
1 November, 2021 - 1 April, 2022

Early Bird Registration:
1 December, 2021 - 1 May, 2022

Abstract Acceptance Notice:
1-7 April, 2022

Congress Date:
22-26 August, 2022

Theme 12: Geoscience Programs & New Technology on Sedimentology

Coordinators: Gilbert Camoin (CEREGE, Aix-en-Provence, France), Jingping Xu (Southern University of Science and Technology, China)

- CALL FOR SESSION PROPOSALS -

Historically, large (scientific scope, geographical area, operational budget, number of participants etc) geoscience programs or expeditions such as IODP, ICDP, MARGINS, or e.g., the Qinghai-Tibet Plateau Expedition incrementally advances, or sometimes revolutionizes the world's understanding of Earth Sciences in general and that of sedimentology in particular. In addition to large budgets and brilliant minds involved in these programs, the use of creative and new technologies is one of the critical factors that propel breakthroughs and discoveries. As suggested by the above title, this theme invite session proposals that: (1) focus on a specific geoscience program from all corners of the world that investigates a variety of sedimentological issues including, but not limited to, fluvial, lacustrine, marine sedimentological processes and deposits (modern or ancient); and/or (2) showcase technological breakthroughs (e.g., sampling devices, analyzing methods, numerical modeling and schemes, etc.) that advance sedimentological research both qualitatively and quantitatively.
